Newton Bhabha Fund Researcher Links Workshop Grants 2020

Submit your proposal by 12 June 2020: 16:00 hrs UK time:

British Council through Newton Bhabha Fund in collaboration with Department of Biotechnology (DBT) announces Researcher Links Workshop Grant 2020 which is designed to promote international development-relevant research and professional development of early career researchers. The programme gives financial support to bring together a UK and India cohort of early career researchers in a workshop with a potential for long term sustainability.

Who can apply for Workshop Grant?

- Not-for-profit higher education institutions or publicly-funded research organisations that have Leading or Established Researchers are eligible to apply as Lead institutions.

- Leading or Established Researchers from above mentioned category of institutions can apply to be Principal Applicants (as defined by the European Commission – for further clarity click here).

- Each proposal must have two Principal Applicants, one from UK, and one from India.

Priority areas

Applications are invited in the following areas:

a. Agriculture and allied areas  
b. Environment and Circular Bio-economy  
c. Biotechnology-education: research/policy for accelerated development of the sector  
d. Health  
e. Artificial Intelligence and Machine learning

Topics of priority within each of the above area are available here

Support for finding the UK partner

University UK International (UUKi) offers a partner matching service to help connect Newton partner country researchers to potential UK partners for Researcher Link workshop Grant call. Those who would like assistance with finding a UK partner can complete UUKi’s Partner Request Form on the UUKi website, before 11th May 2020 .. UUKi is then able to suggest UK researchers or research groups which have similar research interests and expertise.

Please visit here for full call details
