

The National Biopharma Mission (NBM) is a Cabinet approved Industry-Academia Collaborative Mission of Department of Biotechnology (DBT) for Accelerating Early Development for Biopharmaceuticals; being implemented by Biotechnology Industry Research Assistance Council (BIRAC)-a Public Sector Undertaking of DBT. The mission is supporting the development of specific products including Vaccines, Biosimilars, Medical Devices and related technologies. NBM has been mandated to strengthen capacity building in these areas and organize both lecture series and hands-on training programs. These training programmes help to create skilled manpower and add value to the knowledge of an individual. Various training programmes are being organized in the year 2020 in the areas including Biomanufacturing, Medical Device Prototyping, Downstream Processing and Good Clinical Practices.

Kindly visit the link <https://www.nbmworkshops.com/staticTraining.htm> for more information on the schedule of trainings being organized under the aegis of NBM.
