Sanjeevani App? How useful did you find it? Share your experience with us.

SAHIL
New Delhi

E-Sanjeevani app is a living example of how the people of India have made technology a part of their lives. During the COVID-19 pandemic, the government provided a much needed relief by releasing the telemedicine practice guidelines. Thus e-Sanjeevani was the only hope for millions of citizens in the country to access doctors and medical specialists for non-COVID19 and COVID19 medical conditions safely from within the confines of their homes. Going beyond the call of their duty, a team of specialists at Mohali branch of Centre for Development of Advanced Computing rapidly developed and rolled out e-Sanjeevani's patient to doctor variant.

leveraging the potential of information technology, e-Sanjeevani successfully overcomes the challenges of geography, accessibility, cost and distance to provide equitable and quality care to population across India. e-Sanjeevani has proved to be a yardstick for swift capacity building as well as utilising digital technology to strengthen healthcare. e-Sanjeevani is also shaping into the harbinger of Ayushman Bharat Digital Mission that aims to develop the backbone necessary to support the integrated digital health infrastructure of the country. The success of this initiative is analogous with the impact and success of Digital India Mission.
